Great, thank you so much! I look forward to getting the updated letter, whenever it is ready, for me to send to management. Take care today!

Thanks,
Tracie

Tracie –

Here is draft language to your request –

EPA is committed to early and meaningful public involvement, and we will keep the community informed about plans, decisions, and actions throughout the Superfund process. EPA will continue to send site updates to you and other persons in the group as we do everyone interested on our contact list. We will keep you informed of opportunities to provide public comment into the Superfund process. We are happy to meet with individuals, neighborhood groups, and with other members of the public at any time upon request or if site activity warrants. Finally, EPA asked the National Western Citizen's Advisory Committee about their interest in EPA to provide future site activity updates. This forum includes numerous representatives and parties interested in activities in the area and is open to the public.

Thanks, Aaron. Regarding the fourth paragraph of this letter, can you expand (for my clarification) on how EPA will "...continue to keep the broader community informed about our work, participate in community meetings, and continue to provide meaningful opportunities for the community to participate in the Superfund process..." Me being able to answer this question will help me defend this decision to my management.

Thanks,

Tracie

Tracie,

As we discussed, attached is a draft copy of the letter from EPA to the VB/I-70 CAG. Please give me a call to discuss. Thanks

Aaron Urdiales, Branch Chief
